

Trulogix Information Systems

CORPORATE PRESENTATION , MARCH
2014

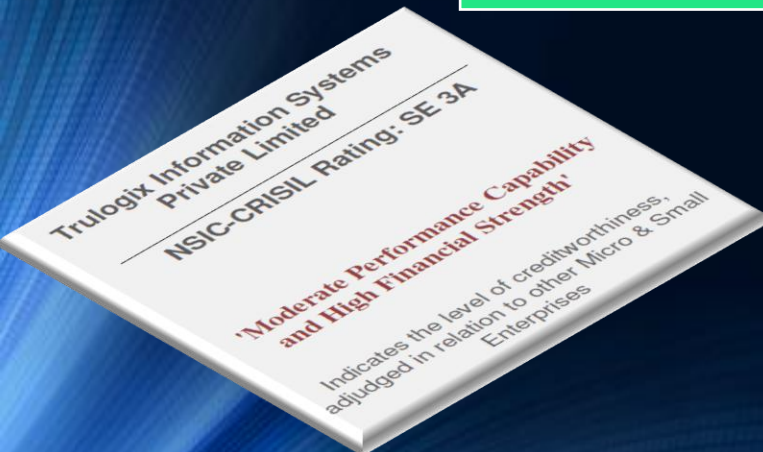

Small organization : Smart People

In business for
seven years
now.

Fully owned state of the
art development facility
of 6000 square feet.
Work in an onsite-
offshore model

Niche technology focus
where "System
Performance" in terms of
response time , robustness
& scalability matters

Accountability at
every step of the
application
development

Avoid frustrating red-tapes
and innumerable email
chains , an insurmountable
evil of doing business with
large IT houses.

The Management Team

Amitava Ray , CEO & President

- Amitava is an American citizen based out of Denver, Colorado. A Bachelor of Computer Science and Engineering graduate, from Jadavpur University, Calcutta, India, a premier technical institution considered to be the progenitor of computer sciences in India , Amitava has been in the Information Technology industry for 17 years now.
- His work has ranged from extremely complicated Artificial Intelligence and advanced robotics related systems, to large-scale business application systems.
- Amitava has worked with two of the largest Enterprise Systems available in the world – Oracle Financials and Manufacturing and SAP.

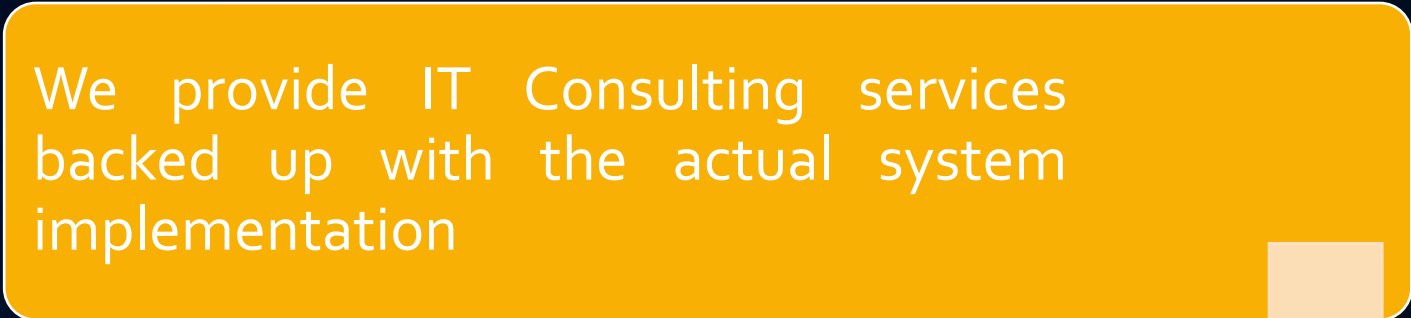

The Management Team

Arunava Ray , Director

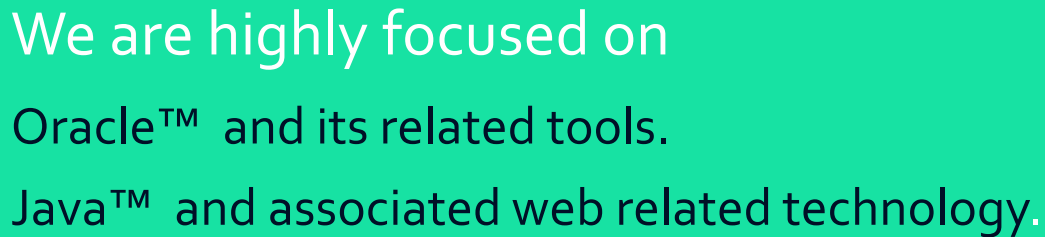

- Arunava holds a MBA from Indian Institute of Management, Indore. Additionally he holds an Executive Leadership Program Certification from University of Pittsburgh, a PMP® certification and is a Bachelor of Technology in Computer Engineering.
- He has around 10+ years experience in Software industry with immense exposure to development of web based retail back office systems for some of the biggest names in Industry. He has also worked at the highest levels for the Government of India.
- Technical & project management skills for development of large scale web based applications under the J2EE framework with cutting edge web 2.0 technologies has been his primary expertise.

What do we do?

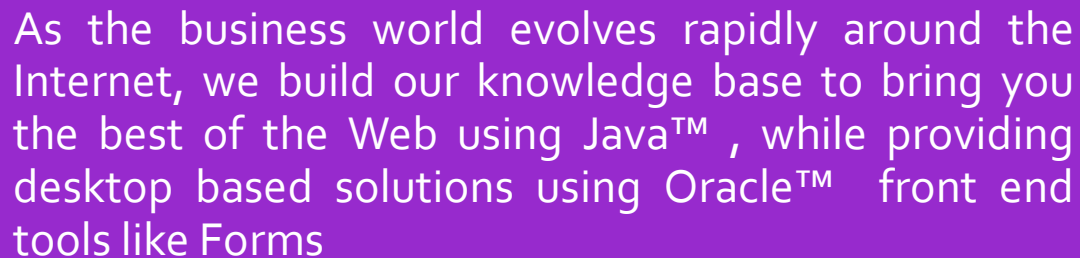

We provide IT Consulting services backed up with the actual system implementation

We are highly focused on Oracle™ and its related tools.
Java™ and associated web related technology.

As the business world evolves rapidly around the Internet, we build our knowledge base to bring you the best of the Web using Java™ , while providing desktop based solutions using Oracle™ front end tools like Forms

Our technology forte

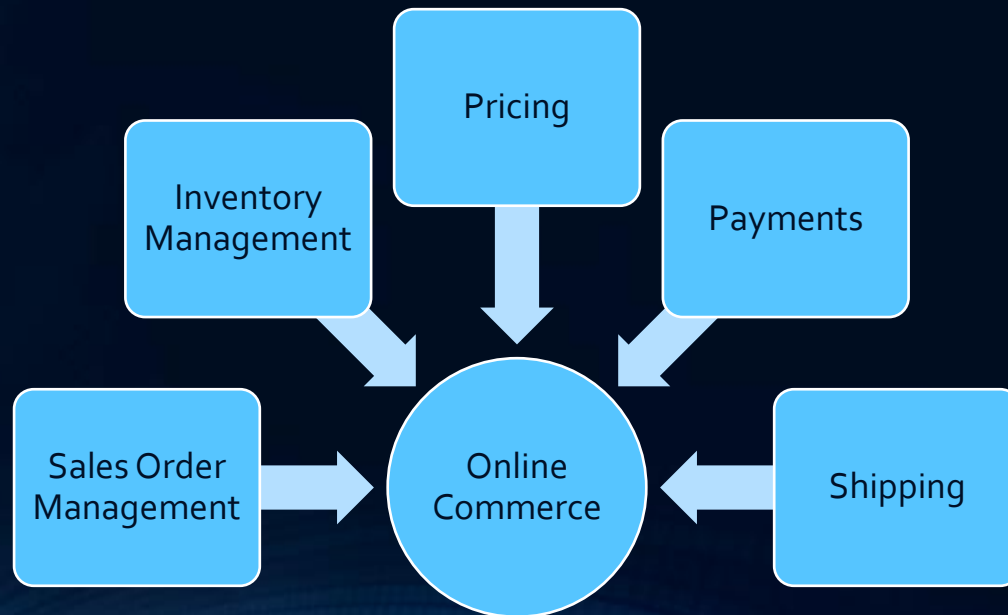

Oracle Tools such as SQL * Plus, PLSQL, Oracle Forms and Reports, JDeveloper etc.

Enterprise Java/J2EE application based on the struts framework and client tools such as jQuery.

Our own proprietary data access layer between an Oracle Database (9i & above), and Java middle-tier, that uses compressed XML technology.

Integration of 3rd party products and services into web-applications (such as Google Maps, Paypal, other Payment gateways).

Our functional forte
